DETAILED ACTION

Allowable Subject Matter

1. Claims 1-2, 4-5 and 7 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Prior art of record fails to teach or fairly suggest a mobile terminal and method for optimizing performance of a mobile terminal comprising a radio communication module, a central computing unit and a plurality of data processing software components designed to optimize operational performance of the mobile terminal by compensating degradation of communication channel properties with motion of the mobile terminal wherein each independent claim (i.e. claims 1 and 5) require, inter alia, providing traveling speed information from one or more sources external to said mobile terminal, said traveling speed information approximately corresponding to traveling speed of the mobile terminal, said sources external to said mobile terminal including an interface for user input or confirmation of input from other sources and a source communicating over a wired or wireless communication link: capturing said traveling speed information in the mobile terminal; distributing the captured traveling speed to each of the data processing software components, said data processing software components including cell search software and channel response estimation software; and controlling communication channel properties by computing communication conditions in accordance with said traveling speed captured in said capturing step.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
